1. Applicant's election with traverse of species of Figure 3 in the reply filed on 4/14/04 is acknowledged. The traversal is on the ground(s) that the Office Action does not provide support for the restriction requirement. This is not found persuasive because the Office Action is an election of species requirement that clearly identifies patentably distinct species, i.e., species of Fig. 3, species of Fig. 5, species of Fig. 8, and species of Fig. 9. See MPEP 809.02 (a). Applicants indicate that claims 1-13, 15 are readable on the elected species. However, claim 11 from which claim 14 depends is now allowable; therefore, claim 14 is also examined and allowable.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is an examiner's statement of reasons for allowance: Claims 1-15 requires novel steps identified as "identifying whether a pixel has a color code value ... a color code value which falls within the range." Such novel steps render the claims allowable.

Yamaguchi, Takemoto, and Higuchi are cited for disclosing the state of the art of color image processing. However, they fail to disclose the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2621

3. This application is in condition for allowance except for the following formal matters: The presence of claims 16-45 to an invention non-elected with traverse in the reply filed on 4/14/04.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
